STATEMENT OF MANAGEMENT'S RESPONSIBILITIES FOR THE PREPARATION AND APPROVAL OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2023

The following statement, which should be read in conjunction with the independent auditors' responsibilities stated in the independent auditors' report, is made with a view to distinguishing the respective responsibilities of management and those of the independent auditors in relation to the financial statements of the State unitary enterprise «Savings bank of the Republic of Tajikistan «Amonatbonk»» (the "Bank").

Management of the Bank is responsible for the preparation of the financial statements that present fairly the financial position of the Bank as at December 31, 2023, the results of its operations, cash flows and changes in shareholders' capital for the year then ended, in accordance with International Financial Reporting Standards (the "IFRS").

In preparing the financial statements, management is responsible for:

- selecting suitable accounting policies and applying them consistently;
- making judgments and estimates that are reasonable and prudent;
- compliance with IFRS requirements or disclosure of all material deviations from IFRS in the notes to the financial statements; and
- preparing the financial statements on a going concern basis, unless it is inappropriate to presume that the Bank will continue in business for the foreseeable future.

Management is also responsible for:

- designing, implementing and maintaining an effective and sound system of internal control, throughout the Bank;
- maintaining proper accounting records that disclose, with reasonable accuracy at any time, the financial position of the Bank, and which enable them to ensure that the financial statements of the Bank comply with IFRS;
- accounting in accordance with the legislation, accounting standards of the Republic of Tajikistan and the requirements of the National Bank of Tajikistan;
- taking such steps as are reasonably available to them to safeguard the assets of the Bank; and
- detecting and preventing fraud and other irregularities.

The financial statements for the year ended December 31, 2023 were approved and authorized for issue on March 29, 2024 by the Management of the Bank.

On behalf of the Management:

Salimzoda Alijon A.
Chairman of the Board

INDEPENDENT AUDITORS' OPINION

To the Management of the SUE SB RT «Amonatbonk»:

Opinion

We have audited the accompanying financial statements of the State unitary enterprise «Savings bank of the Republic of Tajikistan «Amonatbonk»» (the «Bank»), which comprise the statement of financial position as at December 31, 2023 and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

In our opinion the accompanying financial statements present fairly, in all material respects, financial position of the Bank as at December 31, 2023, and its financial performance and cash flows for the year then ended, in accordance with International Financial Reporting Standards (hereafter, IFRS).

Basis for opinion

The financial statements for the year ended December 31, 2022 were audited by another auditor who issued a modified opinion. In our audit of the financial statements for the year ended December 31, 2023, we adjusted the comparative amounts for the year ended December 31, 2022 included in Note 4 to the financial statements. In our opinion, these adjustments are appropriate and carried out properly. We have not performed an audit, review or any other procedures on the financial statements of the Bank for the year ended 31 December 2022, other than as adjusted in Note 4, and accordingly do not express an opinion or any other form of assurance on the financial statements statements for the year ended December 31, 2022, as a whole.

We conducted our audit in accordance with International Standards on Auditing (the "ISA"). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (the "IESBA Code") together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Tajikistan, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw your attention to Note 32 «Risk Management Policy» to the consolidated financial statements, where it is stated that the Bank's liabilities with a maturity of up to one year exceed assets with a maturity of up to one year. The tables include maturities for client accounts and short-term deposits. Based on past experience, the Bank's Management considers it unlikely that all clients will demand payouts upon maturity. The Bank's Management is aware of the importance of maintaining stability in such deposits.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so. Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;l
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

1. GENERAL INFORMATION

In 1925, the bank was initially registered as the State labor savings banks of the Tajik SSR, which was later renamed to the Labor Savings and Credit Bank of the Tajik SSR in 1987. In 1998, the bank was granted the status of a State Bank. On June 19, 2003, the bank was registered with the tax authority in the Shokhmansur district, receiving certificate number #00949992. The bank holds license number #0000312 from the National Bank of Tajikistan for conducting banking activities, which was obtained on April 7, 2023. The bank's main activities include accepting deposits, processing payment transfers, providing loans, conducting foreign currency operations, and engaging in other commercial activities.

As of December 31, 2023, the Bank is owned by the Government of the Republic of Tajikistan.

As of December 31, 2023 and 2022, the number of the Bank's employees was 3,052 and 2,946, respectively.

The Bank's head office is located at: 105 Rudaki Avenue, Dushanbe, Republic of Tajikistan. As of December 31, 2023, and 2022, the Bank had 75 branches within the territory of the Republic of Tajikistan.

The financial statements were approved by the Management of the Bank on April 29, 2024.

2. PRESENTATION OF FINANCIAL STATEMENTS

Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards (the "IFRS") issued by the International Accounting Standards Board (the "IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee (the "IFRIC").

Functional and reporting currency

Items included in the Bank's financial statements are estimated using the currency that best reflects the economic substance of the underlying events and circumstances related to the Bank (the "functional currency"). The functional and reporting currency of the accompanying financial statements is Tajik somoni (the "TJS" or "somoni").

These financial statements are presented in thousands of Tajik somoni, unless otherwise indicated. These financial statements have been prepared under the historical cost convention, except for the evaluation of certain financial instruments carried at fair value.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recognition and valuation of financial instruments

Financial assets and financial liabilities are recognized on the Bank's statement of financial position when the Bank becomes a party to the contractual provisions of the instrument. The Bank reflects purchasing and sale of financial assets and liabilities, which have regular nature at the date of payment. Purchased in such way financial instruments, which will be subsequently estimated at fair value, from the date of the transaction and before the date fixed for the calculations are taken into account in the same way as for acquired instruments.

Financial assets and liabilities are initially recognized at fair value. The acquisition cost of financial assets and liabilities that are not financial assets and liabilities and taken into account at fair value through profit or loss, adjusted for transaction costs, directly related to the acquisition or establishment of a financial asset or financial liability origination. The principles of the following valuation of financial assets and liabilities are disclosed in appropriate accounting policies set out below.

Bank classified financial assets into the following specified categories:

- Financial asset measured at amortized cost;
- Financial asset measured at fair value through other comprehensive income (FVOCI);
- Financial asset measured at fair value through profit or loss.

Debt instruments

The classification and subsequent accounting of debt instruments depend on:

a) Business model of the Bank used to manage financial assets;
b) Characteristics of the financial asset and the contractual cash flows.

Business model

Business model used by the Bank describes the way it manages its financial assets in order to generate cash flows, i.e. business model of the Bank determines whether the cash flows will result from the receipt of contractual cash flows, selling financial assets or both.

The Bank can apply various financial asset management models in the course of its activities, but it is expected that most financial assets will be held till maturity within the framework of the contractual cash flow model in accordance with the Bank's development strategy and limited market tools in the Republic of Tajikistan.

SPPI criteria

In order to assess the compliance of contractual terms of a financial asset with SPPI criteria, the Bank conducts an SPPI test (the "SPPI test") for each debt financial asset. During this assessment the Bank reviews whether the contractual cash flows are consistent with the basic lending arrangement, i.e. interest includes only the time value of money, credit risk, other major credit risks and profits in accordance with the basic lending agreement. If the contractual terms include any risk or volatility that does not correspond to the basic lending agreement, the relevant financial asset is classified and measured at fair value through profit or loss.

Based on these factors, the Bank classifies its debt instruments into the following three categories:

Financial assets measured at amortized cost:

a) The objective of the Bank's business model is to hold the financial asset to collect the contractual cash flows.

b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The carrying amount of these assets is adjusted by expected credit losses. Interest earned on these financial assets is included in "Interest income" using the effective interest method.

Financial assets measured at fair value through Other comprehensive income (FVOCI):

a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Changes in the carrying amount are recognized in other comprehensive income. The recognition of expected credit losses, interest income and changes in foreign currency occurs in profit or loss. When a financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified to profit or loss. Interest earned on these financial assets is recognized in "Interest income" using the effective interest method.

Financial assets measured at fair value through profit or loss (FVTPL):

The Bank classifies financial assets at fair value through profit or loss if they do not meet the criteria to be measured at amortized cost or at fair value through other comprehensive income. Gains or losses on debt instruments measured at fair value through profit or loss (that are not part of the hedging instruments) are recognized in the statement of profit or loss as part of the "Net Trade Income" in the period in which they arise. Interest earned on these financial assets is recognized in "Interest income" using the effective interest method.

The Bank has an option to designate, at initial recognition, a financial asset as measured at FVTPL if doing so eliminates or significantly reduces the measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

All other debt instruments that do not fit in any of the categories must be measured at fair value through profit or loss.

Equity instruments

All equity investments of the Bank are to be measured at fair value in the statement of financial position with fair value changes recognised in profit or loss, except for those equity investments for which the Bank has elected to present value changes in other comprehensive income.

Due to the limited market tools available for trading with equity securities in the Republic of Tajikistan, the Bank classifies equity instruments as measured at fair value through other comprehensive income when investments are held for purposes other than investment income. In such cases, changes in fair value are recognized in other comprehensive income and cannot subsequently be reclassified to profit or loss. Dividends from such investments continue to be recognized in profit or loss as other income.

Gains and losses on equity instruments measured at fair value through profit or loss are recorded in "Net trade income" in the statement of profit or loss.

Reclassification

The Bank reclassifies financial assets if and only if the business model objective for its financial assets changes so its previous model assessment would no longer apply. If reclassification is performed, it must be done prospectively from the reclassification date which is defined as the first day of the first reporting period following the change in business model. The Bank does not restate any previously recognised gains, losses or interest.

Derecognition of financial assets

The recognition of a financial asset (or, if applicable, part of a financial asset or part of a Bank of similar financial assets) ceases when:

- the rights to receive cash flows from the asset have ceased;
- the Bank transferred its rights to receive cash flows from the asset or reserved the right to receive cash flows from the asset, but became obliged to pay these cash flows without significant delay to a third party under the 'transfer' agreement; and
- the Bank either (a) transferred almost all the risks and rewards related to the asset, or (b) did not transfer and did not retain almost all the risks and rewards related to the asset, but transferred a control over the asset.

Modification of contractual cash flows

In circumstances where the Bank reviews or modifies the contractual cash flows for a financial asset, the Bank assesses how significant the change between the original conditions and the new ones is.

If new conditions differ significantly, the Bank derecognizes the original financial asset and recognizes a new financial asset at fair value and recalculates the new effective interest rate for the asset. At the date of modification, the Bank calculates revised expected credit losses and determines whether there is a significant increase in credit risk. However, the Bank also evaluates whether newly recognized financial asset is considered to be impaired upon initial recognition, especially in cases when the revision was due to the fact that the borrower was unable to make the originally agreed payments. The difference in the carrying value of financial assets is reflected in the statement of profit or loss.

If conditions do not differ significantly, then revision or change does not lead to derecognition. The Bank recalculates the carrying amount using initial effective interest rate according to the changes in cashflows and the effect is recognized as profit or loss on modification within the statement of profit or loss.

If modification results in increase of significant risks according to the methodology for calculating of expected credit losses, then the contract modification affects the impairment calculation according to the methodology presented in Note 28.

Classification and subsequent accounting of financial liabilities

The Bank classifies all financial liabilities as subsequently measured at amortized cost, except for:

a) financial liabilities measured at fair value through profit or loss. Such liabilities, including liability derivatives, are subsequently measured at fair value;

b) financial liabilities that arise when the transfer of a financial asset does not meet the requirements for derecognition or when the principle of continuing participation accounting is applied;

c) financial guarantee contracts and loan commitments at interest rate lower than the market. After initial recognition, such contracts should be subsequently evaluated on the basis of the largest of the following amounts:

i) the amount of the impairment allowance created by the Bank; and
ii) the amount initially recognized less the total amount of income, if applicable;

d) contingent consideration recognized by the acquirer in a business combination. Such contingent consideration is subsequently measured at fair value through profit or loss.

Upon initial recognition of a financial liability, the Bank may, in its own discretion, classify it, without the right of subsequent reclassification, as measured at fair value through profit or loss.

Offset of assets and liabilities

The Bank's financial assets and liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derecognition of financial liabilities

A financial obligation (or part of it) is considered extinguished when the debtor:

(a) either fulfils this obligation (or part of it) by paying off the lender, generally in cash, other financial assets, goods or services,
(b) is either legally relieved of primary liability for that obligation (or part of it), as a result of the performance of the legal procedure or as a result of the creditor's decision.
Derecognition of financial liabilities occurs also in the case of significant changes in cash flows, i.e. if the present value of cash flows in accordance with the new conditions, including the payment of commission after deduction of commission received, discounted at the original effective interest rate, differs by at least 10% of the discounted present value of the remaining cash flows of the original financial liability.

Accounting for financial instruments in the comparative period presented

Financial assets are classified into the following categories: at fair value through profit or loss ("FVTPL"); held-to-maturity ("HTM"); available-for-sale ("AFS"); and loans and receivables. Assignment of financial assets to a particular class depends on their characteristics and acquisition purposes and occurs at the time of their acceptance for accounting.

Investments held to maturity. Non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank has the positive intent and ability to hold to maturity are recognized as financial assets in the CFD category.

Held-to-maturity investments are carried at amortized cost using the effective interest method, less any allowance for impairment.

If the Bank sells or reclassifies investments held to maturity of more than an insignificant amount to maturity (other than in certain circumstances), the entire category must be reclassified to available-for-sale financial assets. In addition, the Bank will be prohibited from classifying any financial assets as held-to-maturity during the current financial year and the next two years.

Loans and receivables. Trade receivables, loans and other receivables with fixed or determinable payments that are not quoted on an active market, due from banks, loans to customers and other financial assets are classified as 'loans and receivables'. Loans and receivables are carried at amortized cost using the effective interest method, less any impairment. Interest income is recognized using the effective interest rate, except for short-term receivables where interest income is negligible.

Fair value through profit or loss includes financial assets that:

1. Classified as trading:

- assets acquired or liabilities incurred principally for the purpose of selling or repurchasing in the near term;
- are part of a portfolio of financial instruments that are jointly managed and evidenced to be used to generate short-term profits;
- are a derivative financial instrument (other than effective hedging instruments);

2. Classified by the Bank as an instrument, at the time of initial recognition, subsequently measured at fair value through profit or loss.

Available for sale. Available-for-sale financial assets include non-derivative financial assets that did not fall into the previous three asset groups or were initially classified into this group. Subsequent measurement of assets in this group is carried out at fair value, except for equity securities (shares) of third parties that do not have a quoted market price in an active market, which are measured only at cost.

Accounting for financial liabilities was substantially the same as under IFRS 9, except for gains or losses arising from the Bank's own credit risk associated with liabilities designated as FS&C. Such changes are reflected in OCI without subsequent reclassification to the income statement.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, due from banks and highly liquid short term investments, which can be converted to the corresponding amount of cash in the short term.

Due from banks

During the cause of its operations, the Bank allocates funds and deposit in banks on different periods. Due from banks are initially recognized at fair value. Due from banks are subsequently evaluated at amortized cost using the effective interest rate method. Due from credit institutions are taken into account after deduction of any provision for impairment.
During the cause of its operations, the Bank allocates funds and deposit in banks on different periods. Due from banks are initially recognized at fair value. Due from banks are subsequently evaluated at amortized cost using the effective interest rate method. Due from credit institutions are taken into account after deduction of any provision for impairment.

Derivatives

During the cause of its operations, the Bank signs agreements on various derivative financial instruments. Derivatives are initially recognized at fair value at the date of the derivative contract and are subsequently revaluated to their fair value at each reporting date. Fair value is estimated based on quoted market prices or pricing models that take into account current market and contractual prices of the underlying instruments and other factors. Derivatives are taken into account as assets when their fair value is positive and as liabilities when it is negative. Derivatives are included in financial assets and liabilities at fair value through profit or loss in the balance sheet. Profits and losses arising from these instruments are included in net profit / losses on financial assets and liabilities at fair value through profit or loss in the statement of profit or loss and other comprehensive income.

Loans to customers

Loans to customers are financial assets that are not derivative financial instruments with fixed or determinable payments that do not have market quotations, except for assets, which are classified in other categories of financial instruments.

Loans issued by the Bank are initially recognized at fair value plus transaction costs directly attributable to the acquisition or establishment of such financial assets. If the fair value of the provided funds is not equal to the fair value of loans, for example, in the case of providing loans at rate below than market rates, difference between the fair value of provided funds and the fair value of loans is recognized as a loss on initial recognition of loans and is represented in the statement of profit or loss and other comprehensive income in accordance with the nature of such losses. Subsequently, loans are taken into account at amortized cost using the effective interest rate method. Loans to customers are taken into account after deduction of allowance for impairment.

Write-off of loans and advances

In the case of impossibility of recovery of loans, including through repossession of collateral, they are written-off against the allowance for impairment. Loans and provided funds are written - off after taking by management of the Bank measures to recover amounts owed to the Bank and after selling by the Bank all available collateral. Subsequent recoveries of previously written-off amount are reflected as an offset to the charge for impairment of financial assets in the statement of profit or loss and other comprehensive income in the period of recovery.

Allowance for expected credit loss

The Bank recognizes an estimated allowance for expected credit losses (the "ECL") on loans issued. The Bank recognizes such losses at each reporting date by assessing the existence of impairment evidences. The impairment assessment model of financial assets provides for the assessment of expected credit losses within 12 months and throughout the lifetime of the financial asset.

The Bank's expected losses model is based on the following principles:

Stage 1: 12-month expected credit losses - expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date;
Stage 2: full lifetime expected credit losses - expected credit losses that result from all possible default events over the life of the financial instrument;
Stage 3: expected credit losses that result from all possible default events over the life of the financial instrument, but interest income is calculated based on the gross carrying amount of the financial asset (using effective interest rate) less impairment allowance.

Expected credit losses reflect an objective calculation of the probability-weighted value, which is determined by assessing a number of possible outcomes.

The Bank estimates expected credit losses on a financial instrument using a model that reflects:

a) unbiased and probability-weighted amount determined by assessing the range of possible outcomes;
b) time value of money; and
reasonable and verifiable information on past events, current conditions and projected future economic conditions available at the reporting date without excessive cost or effort.

The Bank creates an estimated allowance for expected credit losses on the following financial instruments that are not measured at fair value along with the reflection of their change in profit or loss:

- financial assets that are debt instruments;
- receivables from (financial) leases;
- issued financial guarantee contracts; and
- issued loan obligations.

Impairment losses on equity-based investments are not reflected in the financial statements.

The Bank calculates an allowance for losses for the entire period of expected credit losses, except for the following instruments, for which such losses are estimated as expected credit losses within 12 months:

- debt investment securities, which are defined as having low credit risk at the reporting date; and
- other financial instruments (other than receivables) for which credit risk has not increased significantly after their initial recognition in the financial statements.

Estimated impairment allowance for receivables on (financial) leases is always calculated over the entire period of expected credit losses.

The Bank believes that a debt security has a low credit risk if its credit rating corresponds to the internationally accepted definition of the term "investment class".

Expected credit losses in a period of 12 months are part of the expected credit losses that arise as a result of defaults on the financial instrument, expected within 12 months after the reporting date.

Expected credit losses are calculated taking into account the probability-weighted credit losses. They are evaluated as follows:

- *for financial assets that are not credit-impaired at the reporting date:* the present value of all cash flows that has not been received (the difference between the cash flows under the contractual terms and expected cash flows to be received by the Bank);
- *for financial assets that are credit-impaired at the reporting date:* the difference between the gross carrying amount and the present value of the estimated future cash flows;
- *for loan commitments:* the present value of the difference between the contractual cash flows if the commitment is used and expected cash flows to be received by the Bank; and
- *for financial guarantee contracts:* expected payments to the holders of the contracts, less any amounts that the Bank expects to collect as a penalty.

Changes in expected credit losses are recognized in the profit or loss using an allowance account. The assets reflected in the statement of financial position are reduced by the amount of expected credit losses. The following indicators are considered by the Bank when determining the existence of impairment evidence: the debtor's or issuer's liquidity, their solvency, business and financial risks, levels and trends of defaults on similar financial assets, national and local forecasts on economic trends and conditions, and the fair value of collateral and guarantees. These and other factors, individually or collectively, provide an objective evidence for recognizing expected credit losses of a financial asset or Bank of financial assets.

More detailed information on calculation of expected credit losses is provided in Note 14.

The Bank calculates allowance for expected credit losses on loan portfolio according to the International Financial Reporting Standard 9 "Financial instruments". The calculation of allowance for impairment of loans issued in accordance with the IFRS approach differs from the allowance calculated in accordance with the requirements of the National bank of Tajikistan (the "NBT").

Property and equipment and Intangible Assets

Property and equipment and intangible assets are recorded at historical cost, which includes the acquisition cost, delivery costs to the intended location, and the cost of bringing the asset to the necessary condition for operation, net of accumulated depreciation. However, buildings and structures are revalued by the Bank.

Depreciation is charged to the carrying amount of property and equipment and intangible assets in order to write off assets over their useful lives. Depreciation is calculated on the basis of the straight line method using the following rates:

Buildings and constructions	7%
Computer equipment	12,5%
Furniture and office equipment	10%
Vehicle	10%
Communication equipment	8%
Other	4%
Intangible assets	10%

Amortization of leasehold improvements is calculated over the useful life of the related leased assets. The cost of repair and overhaul are reflected in the statement of profit or loss and other comprehensive income within operating expenses as incurred unless they meet the requirements for capitalization.

On each reporting date, the bank evaluates whether the carrying amount of fixed assets and intangible assets exceeds their recoverable amount. The recoverable amount is the higher of the fair value less costs to sell and the value in use. If the carrying amount of fixed assets and intangible assets exceeds their recoverable amount, the bank reduces the carrying amount of fixed assets to their recoverable amount. After recognizing an impairment loss, depreciation on fixed assets is adjusted in subsequent periods to allocate the revalued carrying amount of assets less any residual value (if applicable) evenly over the remaining useful life.

During write-off of a revalued property and equipment, the amounts included in the revaluation reserve are transferred to retained earnings.

Long-term assets held for sale

The Bank recognizes long-term assets as held for sale if its carrying amount is recovered primarily through the sale of such assets rather than through further use. At the same time, these assets must be ready for immediate sale in their current condition and the probability of their sale within one year from the date of classification must be high. Assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. If the carrying amount exceeds fair value less costs to sell, the Bank recognizes an impairment loss in the income statement. Any subsequent increase in fair value less costs to sell is recognized up to the amount of the previously recognized cumulative impairment loss.

Taxation

Income tax expense represents sum of the current and deferred tax.

Current tax

Income tax payable for current period is recognized based on taxable income amount earned during the year. Taxable income differs from income that is reported in the statement of profit or loss and other comprehensive income, because it does not cover items of income or expense that are taxable or deductible in other years and also excludes items that are not taxable or deductible for taxation purposes. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deffered tax liabilities are usually recognized in relation to all temporary differences that increase taxable income, but deferred tax assets are recognized regarding with the availability of taxable income in future to offset respective deffered tax assets.
Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences, when the Bank is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized. Deferred tax is reflected in statement of profit or loss and other comprehensive income, except when they connected with items, which are directly related to equity, and in this case deferred tax is also reflected within equity.

The Bank conducts netting of deferred tax assets and liabilities and reflects summary difference in the financial statement, if:

- The Bank has a legally enforceable right for netting current tax assets against current tax liabilities; and
- Deferred tax assets and deferred tax liabilities relate to corporate taxes levied by the same taxation authority from the same taxable entity.

In addition to income tax there are requirements on accrual and payments of various taxes applicable to the Bank's activities in the Republic of Tajikistan where the Bank performs its activities.

Borrowings

Borrowings are initially recognized at fair value in the accounting records. Subsequently, the obligations arising from such transactions are recognized at amortized cost, and the difference between the carrying amount and the repayment amount is reflected in the income statement and other comprehensive income over the term of the borrowing using the effective interest rate method within interest expenses.

Contingent liabilities

Contingent liabilities are not recognized in the statement of financial position but are disclosed in financial statements unless the possibility of any outflow in settlement is remote. A contingent asset is not recognized in the statement of financial position but disclosed when an inflow of economic benefits is probable.

Share capital

Share capital is recognized at initial cost.

Dividends are recorded as a reduction in the period in which they are declared. Dividends declared after the balance sheet date are treated as an event after the balance sheet date under IAS 10 "Events after the reporting period" and information about it are disclosed accordingly.

General reserves

In the Bank, a reserve is created for future operations, which is formed through mandatory annual contributions according to the decision of the Bank's Management. This reserve is intended exclusively to cover the losses of the Bank. The decision on the use of the funds of the Bank's reserve fund is also made by the Bank's Management with the preliminary approval of the annual report.

Pension liabilities

In accordance with the laws of the Republic of Tajikistan the Bank withholds the amount of pension contributions from employee's salaries and transfers them to the State pension fund. The existing pension system provides for the calculation of current payments by the employer as a percentage of current gross salary payments. Such expenses are recognized in period, which includes appropriately payment for employees. At retirement, all pension payments are implemented by above mentioned pension fund. The Bank does not have any pension arrangements separate from the State pension system of the Republic of Tajikistan. In addition, the Bank has no benefits provided to employees upon retirement, or other significant compensated benefits requiring accrual.

Recognition of income and expense

Interest income on financial assets is recognized if there is a high probability of the Bank receiving economic benefits and the amount of income can be reliably determined. Interest income and expenses are recognized on an accrual basis and are calculated using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial asset or financial liability (or a group of financial assets or financial liabilities) and allocating interest income or interest expense over the relevant period.

The effective interest rate is the interest rate that discounts projected future cash payments or receipts over the expected term of a financial asset or liability precisely to the gross carrying amount of the financial asset or to the amortized cost of the financial liability.

Interest earned on assets at fair value is classified within interest income.

Recognition of commission income and expenses

Commission for loan origination and related direct costs associated with the loans providing are reflected as an adjustment to the effective interest rate on loans.

If there is a possibility that due to the presence of a liability of providing a credit will be signed a contract for a loan, commitment fee on the loan included in deferred revenue (together with related direct costs) and subsequently recognized as adjustment to actual income on the loan. If the probability of that the commitment to extend credit is estimated as low, the commitment fee on the loan is recognized in the statement of profit or loss and other comprehensive income over the remaining period of the loan commitment.
Upon expiration credit commitments, which are not completed by providing a loan, commitment fee on the loan are recognized in the statement of profit or loss and other comprehensive income on the date of its expiration.

Foreign currency exchange

Monetary assets and liabilities denominated in foreign currencies are exchanged to Tajik somoni at the market rates prevailing at December 31. Transactions denominated in foreign currencies are reported at the rates of exchange prevailing at the date of the transaction. Any gains or losses arising from a change in exchange rates subsequent to the date of the transaction are included as an exchange gain or loss in the statement of profit or loss and other comprehensive income.

Exchange rate

The official exchange rates at year-end used by the Bank during preparation of the financial statements were:

	December 31, 2023	**December 31, 2022**
US dollar /Tajik somoni	10.9571	10.2024
EURO/Tajik somoni	12.0944	10.8911
Russian ruble /Tajik somoni	0.1217	0.1445

Areas of significant use of estimates and assumptions of management

The preparation of financial statements requires from Management to make estimates and assumptions that have an influence on reported amounts of assets and liabilities of the Bank, the disclosure of contingent assets and liabilities at the balance sheet date and the reported amounts of revenues and expenses during the reporting period. The Bank's management conducts evaluations and judgments on an ongoing basis, based on previous experience and a number of other factors that are considered reasonable in the current environment. Actual results could differ from those estimates. The following estimates and assumptions are important to present financial position of the Bank.

Allowance for impairment of loans and accounts receivable

The Bank regularly reviews its loans for impairment. Reserves of the Bank's loan impairment are established to recognize incurred impairment losses in its portfolio of loans and receivables. The Bank considers accounting estimates related to the allowance for impairment of loans and receivables, a key source of uncertainty of estimation due to the fact that (i) they are highly susceptible to change from period to period as the assumptions on future non-compliance indicators and assessment of potential losses related to impaired loans and receivables, based on recent work, and (ii) any significant difference between the estimated losses and actual losses of the Bank requires from the Bank to create reserves, which could have a material impact on its financial statements in future periods.

The Bank uses management judgment to estimate the amount of any impairment loss in cases where the borrower has financial difficulties and there is little historical data relating to similar borrowers. Analogously, the Bank estimates changes in future cash flows based on past experience, the client's behavior in the past, the available data, indicating an adverse change in the status of repayment by borrowers in the Bank, as well as national or local economic conditions that correlate with defaults on assets in this Bank. Management uses estimates based on historical experience of losses on assets with credit risk characteristics and objective evidence of impairment similar to those in this Bank of loans. The Bank uses an assessment of Management for adjusting the available data on a Bank of loans to reflect current circumstances not reflected in historical data.

It should be noted that the assessment of expected credit losses includes a subjective factor. The Bank's management believes that the amount of impairment recognized is sufficient to cover losses incurred on risk-exposed assets as of the reporting date, taking into account forecasted data. However, it is possible that at certain times, the Bank may incur losses greater than the recognized provision for expected credit losses.

Reserves for impairment of financial assets in the financial statements were determined based on the prevailing economic conditions. As of December 31, 2023, and 2022, the carrying amount of reserves for expected credit losses on loans granted to customers amounted to 298,788 thousand Somoni and 136,388 thousand Somoni, respectively (Note 14).

Application of new and revised international financial reporting standards (IFRSs)

The Bank has adopted the following new or revised standards and interpretations issued by International Accounting Standards Board and the International Financial Reporting Interpretations Committee (the "IFRIC") which became effective for the Bank's financial statement for the year ended December 31, 2023:

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 - Interest rate benchmark reform – Phase 2 provides a practical expedient for modifications required by the reform, clarify that hedge accounting is not discontinued solely because of the IBOR reform, and introduce disclosures that allow users to understand the nature and extent of risks arising from the IBOR reform to which the entity is exposed to and how the entity manages those risks as well as the entity's progress in transitioning from IBORs to alternative benchmark rates, and how the entity is managing this transition.
- Amendments to IAS 16 Property, plant and equipment - proceeds before intended use. The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss. Annual reporting periods beginning on or after 1 January 2022.

- Amendments to IAS 37 Provisions, contingent liabilities and contingent assets onerous contracts - cost of fulfilling a contract. The amendments specify that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract). Annual reporting periods beginning on or after 1 January 2022.
- The amendment to IFRS 9 Financial instruments – clarifies which fees an entity includes when it applies the 10 per cent test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognise a financial liability. An entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf. Annual reporting periods beginning on or after 1 January 2022.
- IFRS 17 Insurance contracts requires insurance liabilities to be measured at a current fulfillment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts. Applicable to annual reporting periods beginning on or after January 1, 2023.
- Amendments to IAS 1 Presentation of financial statements classification of liabilities as current or non-current. The amendments aim to promote consistency in applying the requirements by helping entities determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. Annual reporting periods beginning on or after January 1, 2023.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) require that an entity discloses its material accounting policies, instead of its significant accounting policies. Further amendments explain how an entity can identify a material accounting policy. To support the amendment, the Board has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2. Annual reporting periods beginning on or after 1 January 2023.
- Definition of Accounting Estimates (Amendments to IAS 8) replaces the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new developments is not the correction of an error. Annual reporting periods beginning on or after 1 January 2023.
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12) clarifies that the initial recognition exemption does not apply to transactions in which equal amounts of deductible and taxable temporary differences arise on initial recognition. Annual reporting periods beginning on or after 1 January 2023

New and revised IFRSs in issue but not yet effective

A number of new standards, amendments to standards and interpretations are not yet effective as at December 31, 2023 and have not been applied in preparing these financial statements. Of these innovations, the following standards and amendments have the potential to have an impact on the financial and operating activities of the Bank. The Bank plans to apply these standards and amendments from the date of their entry into force. The potential impact of the new standards on the Bank's financial statements has not yet been analyzed.

At the date these financial statements were authorized, the following new standards and interpretations were issued but not yet effective and the Bank has not early adopted:

- Amendments to IAS 7 "Statement of cash flows" and IFRS 7 "Financial instruments: Disclosures" which will introduce targeted disclosure requirements that will enhance transparency of supplier finance arrangements and their effects on Bank's liabilities and cash flows.
- Amendments to IAS 1 "Presentation of Financial Statements" requires to classify liabilities as current or noncurrent based on Bank's rights to defer settlement for at least 12 months which must exist and have a substance as at the reporting date. Only covenants with which a company must comply on or before the reporting date may affect this right.
- Amendments to IFRS 16 "Leases" which introduce a new model for accounting of variable payments and will require seller-lessees to reassess and possibly restate sale-leaseback transactions.

- Introduction of IFRS S1 "General Requirements for Disclosure of Sustainability-related Financial Information" and IFRS S2 "Climate-related Disclosures" which provide a framework for Bank's to report on all sustainability-related topics across the areas of governance, strategy and risk management. These standards are also designed to disclose information that is expected to affect the assessments that investors make about Bank's future cash flows.

The bank intends to apply the new standards and amendments from the date they come into effect.

4. RESTATEMENT AND RECLASSIFICATION

Statement of financial position	As previously reported December 31, 2022	Amount of restatement	As restated December 31, 2022 *(restated)*
ASSETS			
Cash and cash equivalents	2,419,120	(154,580)	2,573,700
Due from banks	1,105,151	-	1,105,151
Obligatory reserve in the National bank of Tajikistan	154,579	154,579	-
Loans to customers	1,258,735	(134,017)	1,392,752
Investment securities	11,000	(617,062)	628,062
Investments held to maturity	617,062	617,062	-
Property, plant and equipment	575,084	-	575,083
Long-term assets held for sale	24,018	24,018	-
Intangible assets	14,576	-	14,576
Right-of-use asset	4,974	-	4,974
Foreclosed assets	-	(24,018)	24,018
Deferred tax assets	13,519	(18,192)	31,711
Other assets	74,792	-	74,792
TOTAL ASSETS	6,272,610	(152,210)	6,424,819
LIABILITIES AND EQUITY			
LIABILITIES			
Customer accounts	4,960,643	-	4,960,643
Borrowingsr	162,365	-	162,365
Subordinated loans	50,000	-	50,000
Due to banks and financial institutions	278,684	-	278,684
Lease liabilities	5,252	-	5,252
Other liabilities	200,299	-	200,299
TOTAL LIABILITIES	5,657,243	-	5,657,243
EQUITY			
Share capital	70,935	-	70,935
Retained earnings	52,031	(152,211)	204,242
Reserve for future operations	248,485	-	248,485
Reserve for contingencies	29,640	1	29,639
Revaluation of FA	187,625	-	187,625
General reserves	26,651	-	26,651
TOTAL EQUITY	615,367	(152,210)	767,577

The effect of the adjustments made to the statement of profit and loss and other comprehensive income for the year ended December 31, 2022 is as follows:

In the statement of profit or loss and other comprehensive income:	As previously reported For the year ended December 31, 2022	Amount of restatement	As restated For the year ended December 31, 2022 *(restated)*
EXPENSES			
Accrual of a reserve for asset depreciation, on which interest is accrued	79,697	8,110	71,587
Income tax expenses	45,624	(72,548)	26,924
TOTAL	125,321	26,810	98,511

5. NET INTEREST INCOME

Interest income and expenses of the Bank for the years ended December 31, 2023 and 2022 are as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022 *(restated)*
Interest income includes:		
Loans to customers	350,454	215,144
Term placement	52,352	23,778
Investments held to maturity	32,501	54,196
Due from banks	15,074	22,281
Other	5,134	-
	455,515	**315,399**
Interest expenses includes:		
Term deposits	79,152	72,508
Demand deposits	6,023	4,457
Borrowings	5,591	6,905
Saving deposits	253	178
Other	5,132	323
	96,151	**84,371**

6. COMMISSION INCOME AND EXPENSES

Commission income of the Bank for the years ended December 31, 2023 and 2022 are as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022 *(restated)*
Commission income		
Commission income from account servicing	207,582	182,696
Commission income from money transfer	8,542	24,176
Commission income from the sale and maintenance of plastic cards	504	298
Other commission income	978	248
	217,606	**207,418**

Commission expenses of the Bank for the years ended December 31, 2023 and 2022 are as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022 *(restated)*
Commission expenses		
Cash operations	14,855	23,303
Settlement operations	8,610	5,209
Software maintenance expenses	850	5,170
Borrowings	438	-
Other	6,406	4,654
	31,159	**38,336**

7. NET GAIN FROM FOREIGN EXCHANGE TRANSACTIONS

Net gain on foreign exchange transactions of the Bank for the years ended December 31, 2023 and 2022 comprise:

	For the year ended December 31, 2023	For the year ended December 31, 2022
Dealing operations, net	21,361	90,219
Foreign exchange differences, net	(38)	(11,113)
	21,323	**79,106**

8. ACCRUAL OF ALLOWANCE FOR IMPAIRMENT AND EXPECTED CREDIT LOSSES FOR ASSETS EXCEPT LOANS GRANTED TO CLIENTS

Movement in allowance for impairment and expected credit losses on assets for the years ended December 31, 2023 and 2022 was as follows:

	NBT correspondence accounts	Due from banks	Term placement	Investment securities	Settlements between credit institutions	Money transfer systems	Account receivable	Assets in liquidating organizations	Shortage of cash	Long-term assets held for sale	Total: (restated)
As of December 31, 2020	-	419	916	-	4,938	-	148	7,323	39,581	109,261	162,587
Accrual	-	1,384	2,378	-	-	-	4,278	107	1,756	72,292	82,195
Recovery	-	-	-	-	-	-	-	(4,528)	(97)	(14,469)	(19,094)
Write-off	-	-	-	-	-	-	(148)	(177)	-	(53)	(378)

(Recovery) /accrual of unused vacation provision	(63)	503
Other	614	13,848
	277,651	**249,613**

10. INCOME TAX

The Bank measures and records its current income tax payable and its tax base within assets and liabilities in accordance with the tax regulation of the Republic of Tajikistan, which may differ from the IFRS. For the years ended December 31, 2023 on the territory of the Republic of Tajikistan the income tax rate for legal entities was equal to 20%.

The Bank is subject to certain permanent tax differences due to the non-tax deductibility of certain expenses and certain income being treated as non-taxable for tax purposes.

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. Temporary differences as at December 31, 2023 and 2022 relate mostly to different methods of income and expense recognition as well as to temporary differences generated by tax book bases' differences for certain assets and liabilities.

	For the year ended December 31, 2023	For the year ended December 31, 2022 *(restated)*
Current income tax expenses	30,927	44,115
(Savings) /Accrual of deferred income tax expenses	1,697	1,509
Income tax expenses	32,624	45,624

The ratio of tax expenses to accounting profit for the years ended December 31, 2023, and 2022, is presented as follows:

	For the year ended December 31, 2023	Effective tax rate (%)	For the year ended December 31, 2022 *(restated)*	Effective tax rate (%)
Income before taxes	167,118		133,629	
Tax at statutory rate	33,424	20%	26,726	20%
Tax effect of permanent differences	(800)	0%	18,898	14%
Income tax expense	32,624	20%	45,624	0%

Tax effect from temporary differences as at December 31, 2023 and December 31, 2022 is presented below:

	December 31, 2023	December 31, 2022 *(restated)*
Deferred income tax assets:		
Due from banks	31,229	10,321
Other assets	660	660
Loans to customers	-	33,124
Long-term assets held for sale	37,978	23,210
Interest payable on borrowings	1,999	2,988
Lease liabilities	2,629	5,252
Total deferred income tax assets less allowance	74,495	75,555
Deferred income tax liabilities:		
Loans to customers	(8,206)	-
Right-of-use asset	(2,553)	(4,974)
Total deferred income tax liabilities	(10,759)	(4,974)
Net deferred tax liabilities	63,736	70,581
Net deferred tax liabilities (at the established rate of 20%)	12,747	14,116

	December 31, 2022 *(restated)*	December 31, 2021
Deferred income tax assets:		
Due from banks	10,321	5,097
Other assets	660	660
Loans to customers	33,124	30,647
Long-term assets held for sale	23,210	37,674
Interest payable on borrowings	2,988	705
Lease liabilities	5,252	6,055
Total deferred income tax assets less allowance	75,555	80,838
Deferred income tax liabilities:		
Right-of-use asset	(4,974)	(5,700)
Total deferred income tax liabilities	(4,974)	(5,700)
Net deferred tax liabilities	70,581	75,138
Net deferred tax liabilities (at the established rate of 20%)	14,116	17,282

Temporary differences between tax accounting and current financial statement lead to deferred tax liabilities as at December 31, 2023 and December 31, 2022 as a result of the following:

	December 31, 2022 *(restated)*	**Recognized in the statement of profit or loss and other comprehensive income**	**Recognized in capital**	**December 31, 2023**
Temporary differences:				
Due from banks	10,321	20,908	-	31,229

11. CASH AND CASH EQUIVALENTS

As of 31 December 2023 and 2022 cash and cash equivalents presented in the statement of financial position comprise the following components:

	December 31, 2023	December 31, 2022 *(restated)*
Cash on hand	348,222	460,404
Cash on ATM	61,429	58,879
Current account at NBT	2,099,834	1,899,837
	2,509,485	**2,419,120**

12. RESTRICTED CASH

As of 31 December 2023 and 2022 the restricted cash of the Bank in the National Bank of Tajikistan is presented as follows:

	December 31, 2023	December 31, 2022
Obligatory reserve in the National bank of Tajikistan	227,743	154,579
	227,743	**154,579**

In accordance with Instruction No. 194 of the National Bank of Tajikistan (hereinafter "NBT"), the Group is obliged to form mandatory reserves and deposit this amount in the NBT. The basis for calculating the reserves is the average balance of deposits of the customer group at the end of the month.

13. DUE FROM BANKS

As at December 31, 2023 and December 31, 2022 due from banks consisted of the following:

	December 31, 2023	December 31, 2022
Term deposit	397,343	315,007
Correspondent accounts with foreign banks	519,326	347,803
Correspondent accounts with local banks	373,932	452,662
Less expected credit losses for due from banks	(31,229)	(10,321)
	1,259,372	**1,105,151**

14. LOANS TO CUSTOMERS

As at December 31, 2023 and 2022 loans to customers of the Bank comprise of the following:

	December 31, 2023	December 31, 2022 *(restated)*
Loans to customers	1,748,696	1,240,145
Revised and overdue loans	194,953	118,662
Interest accrued	124,485	36,316
Less allowance for expected credit losses	(298,788)	(136,388)
	1,769,346	1,258,735

Below is information on lending sectors:

	December 31, 2023	December 31, 2022 *(restated)*
Consumer sector	549,051	350,008
Trade	517,151	453,298
Agriculture	340,387	205,680
Manufacture	310,624	66,634
Construction	171,685	134,641
Services	138,970	147,775
Transport	40,266	37,083
Other	-	4
Less allowance for impairment losses	(298,788)	(136,388)
	1,769,346	1,258,735

Information on collateral for loans issued is presented as follows:

	December 31, 2023	December 31, 2022 *(restated)*
Real estate	1,164,091	685,350
Guarantee	337,834	340,065
Unsecured	519,300	361,446
Deposits	5,489	1,265
Promiscuity guarantee	7,583	5,548
Jewelry	1,066	1,397
Other	32,771	52
Less allowance for impairment losses	(298,788)	(136,388)
	1,769,346	1,258,735

As of December 31, 2023, and 2022, the entire loan portfolio, amounting to 1,769,346 thousand somoni and 1,258,735 thousand somoni (including accrued interest and the reserve amount), respectively, was extended to clients conducting their activities within the territory of the Republic of Tajikistan, representing significant geographical concentration and maximum credit risk exposure.

The table below shows the movements in the allowance for expected credit losses on loans to customers:

	Expected credit losses on loans to customers
As of December 31, 2021	160,487
Accrual	79,185
Recovery	(103,367)
Write-off	83
As of December 31, 2022 *(restated)*	136,388
Accrual	194,908
Recovery	(32,508)
As of December 31, 2023	298,788

The table below provides information on the quality of loans to customers as at 31 December 2023:

	Loans before allowance for expected credit losses	Allowance for expected credit losses	Loans less allowance for expected credit losses	Expected credit losses to gross loans
not overdue	1,567,033	(177,867)	1,389,166	11%
overdue less than 30 days	242,581	(30,317)	212,264	12%
overdue for period from 30 to 89 days	69,021	(20,721)	48,300	30%
overdue for period from 90 to 179 days	37,418	(21,410)	16,008	57%
overdue for period from 180 to 360 days	13,859	(4,232)	9,627	31%
overdue more than 360 days	138,222	(44,241)	93,981	32%
Total loans to customers	**2,068,134**	**(298,788)**	**1,769,346**	**14%**

The table below provides information on the quality of loans to customers as at 31 December 2022: *(restated)*:

	Loans before allowance for expected credit losses	Allowance for expected credit losses	Loans less allowance for expected credit losses	Expected credit losses to gross loans
not overdue	654,012	(4,798)	649,214	1%
overdue less than 30 days	320,864	(53)	320,811	0%
overdue for period from 30 to 89 days	229,489	(3,279)	226,210	1%
overdue for period from 90 to 179 days	19,258	(5,199)	14,059	27%
overdue for period from 180 to 360 days	24,697	(32,279)	(7,582)	131%
overdue more than 360 days	146,803	(90,780)	56,023	62%
Total loans to customers	**1,395,123**	**(136,388)**	**1,258,735**	**10%**

15. INVESTMENT SECURITIES

As of December 31, 2023, and 2022, the Bank's investments in securities are presented as follows:

	December 31, 2023	December 31, 2022 *(restated)*
OJSC "Rogun HPP"	11,000	11,000
	11,000	**11,000**

Investment securities accounted for at fair value through other comprehensive income are represented by shares of the company OJSC "Rogun Hydroelectric Power Plant." The Bank's management has chosen the fair value through other comprehensive income model for equity securities due to infrequent transactions and the absence of an active market for these financial instruments.

16. INVESTMENTS HELD TO MATURITY

As of December 31, 2023, and 2022, the Bank's investment held to maturity are presented as follows:

	December 31, 2023	December 31, 2022 *(restated)*
Certificates from NBT	260,623	609,239
Interest receivable	3,589	7,823
	264,212	**617,062**

As of December 31, 2023, and 2022, the Bank held certificates of the National Bank of Tajikistan amounting to 260,623 thousand somoni and 609,239 thousand somoni, respectively. The discount amount for the same periods was 3,589 thousand somoni and 7,823 thousand somoni, respectively.

17. PROPERTY AND EQUIPMENT

As at December 31, 2023 and 2022 property and equipment of the Bank comprise of the following:

	Buildings and constructions	Furniture and equipment	Vehicles	Construction in progress	Total
Cost					
December 31, 2021	**435,351**	**149,297**	**7,871**	**135,749**	**728,268**
Additions	38,868	3,405	723	26,204	69,200
Internal movement	2,241	-	-	(2,241)	-

December 31, 2021	**9,656**	**9,656**
Charge for the period	2,554	2,554
Disposal	(1,449)	(1,449)
December 31, 2022	**10,761**	**10,761**
Charge for the period	2,638	2,638
Disposal	-	-
December 31, 2023	**13,399**	**13,399**
December 31, 2021	**15,875**	**15,875**
December 31, 2022	**14,576**	**14,576**
December 31, 2023	**11,938**	**11,938**

19. RIGHT-OF-USE ASSET

As of 31 December 2023 and 2022 the Bank's right-of-use assets and lease liabilities were formed as follows:

	December 31, 2023	December 31, 2022
Right-of-use assets		
Building	2,553	4,974
	2,553	4,974

	December 31, 2023	December 31, 2022
Lease liability		
Current	1,578	4,143
Long term	1,051	1,109
	2,629	**5,252**

	Buildings and constructions	Total	Lease liability
December 31, 2021	**5,700**	**5,700**	**6,055**
Effect of change of discount rate	63	63	43
Additions	3,133	3,133	3,133
Depreciation of Right-of-use assets	3,922	3,922	-
Interest expenses on lease liabilities	-	-	323
Payments	-	-	4,302
December 31, 2022	**4,974**	**4,974**	**5,252**
Additions	604	604	604
Modification	(509)	(509)	(509)
Depreciation of Right-of-use assets	(2,519)	(2,519)	139
Other income/expenses	3	3	-
Payments	-	-	(2,857)
December 31, 2023	**2,553**	**2,553**	**2,629**

The discount rate was determined as the average rate of attracting additional borrowed funds. For discounting lease payments in 2023, the discount rate was set at 3.66%.

20. LONG-TERM ASSETS HELD FOR SALE

As of 31 December 2023 and 2022 The Bank's long-term assets held for sale are represented as follows:

	December 31, 2023	December 31, 2022
Factories and plants	36,753	36,656
Houses	32,335	38,104
Warehouses	29,431	7,269
Apartments	29,397	19,789
Buildings and structures	27,527	29,732
Fuel storage facility	26,817	26,817
Farms	17,534	5,615
Buildings and facilities (Formaceutics)	11,759	10,742
Restaurant	5,554	5,096
Gas station	3,088	2,398
Passenger terminal	2,859	2,859
Car	127	98
Property on the market	-	5,964
Other	23,819	17,854
	247,000	**208,993**
Allowance for expected credit losses	(218,543)	(184,975)
	28,457	**24,018**

As of 31 December 2023 and 2022 non-current assets held for sale represent residential property taken over by the Bank. A corresponding provision has been made for these assets (Note 8). The assessment of the required amount of the allowance as of the reporting date was made by the management of the Bank on the basis of instructions from the NBT and may not fully reflect the likelihood of cash reimbursement receival by the Bank from their sale.

21. OTHER ASSETS

As of 31 December 2023 and 2022 other assets of the Bank are presented as follows:

	December 31, 2023	December 31, 2022
Other financial assets		
Settlement with financial institutions	95,597	28,222
Accounts receivable	28,241	22,046

Other	1,834	1,590
Expected credit losses for cash shortage	-	(34,544)
Expected credit losses for accounts receivable	4,278	4,278
Total non-financial assets	**42,248**	**29,457**

As of December 31, 2023, and 2022, the reserve amount was 7,263 thousand somoni and 4,938 thousand somoni, respectively. These amounts in terms of financial assets represent reserves for expected credit losses on accounts receivable, money transfer systems, and assets in liquidating organizations. Movement of reserves for expected credit losses on accounts receivable, money transfer systems, and assets in liquidating organizations is provided in Note 8.

22. DUE TO BANKS AND FINANCIAL INSTITUTIONS

As of 31 December 2023 and 2022 due to banks and financial institutions of the Bank are presented as follows:

	December 31, 2023	December 31, 2022
Correspondent accounts of non-Bank credit institutions in Tajikistan	89,413	51,483
Correspondent accounts for banks in Tajikistan	66,688	30,490
Settlements between credit organizations	268,136	196,711
	424,238	**278,684**

23. CUSTOMER ACCOUNTS

As of 31 December 2023 and 2022 customer accounts of the Bank are presented as follows:

	December 31, 2023	December 31, 2022
Budget deposits	2,180,558	1,393,619
Time deposits	1,061,299	1,007,283
Demand deposits	976,911	1,478,274
Saving deposits	1,159,862	1,005,810
Interets payable	86,754	75,657
	5,465,383	**4,960,643**

24. BORROWINGS

As of 31 December 2023 and 2022 borrowings of the Bank are presented as follows:

	December 31, 2023	December 31, 2022
Interbank loans	88,063	159,378
Interest payable	1,999	2,988
	90,062	**162,365**

25. OTHER INCOME, NET

As of 31 December 2023 and 2022 other income, net of the Bank are presented as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022 *(restated)*
Other income		
Income from the recovery of written-off assets	(76,625)	57,848
Construction costs	-	108,644
Other income	(475)	3,111
	(77,100)	**47,685**
Other expenses		
Other expenses	4	-
	4	-
	(77,096)	**47,685**

26. OTHER LIABILITIES

As of 31 December 2023 and 2022 other liabilities of the Bank are presented as follows:

	December 31, 2023	December 31, 2022
Account payable	65,597	169,568
Government's funds	8,665	12,958
Unused vacation	8,288	5,775
Money transfer	6,088	6,110
Employee bonus provision	93	893
Other	12,807	4,994
	101,538	**200,299**

Accounts payable presented by the Bank as of December 31, 2023, mainly consist of obligations for accounts designated for collecting funds for donations to victims of earthquakes and other natural disasters, as well as obligations for mutual settlements with the Agency for Social Insurance and Pensions under the Government of the Republic of Tajikistan.

The movement in the provision for unused vacation for the years ended 31 December 2023 and 2022 is as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022
January 1	5,775	5,272
Accrual	5,567	1,964
Recovery	(3,055)	(1,461)
December 31	8,288	5,775

27. SHARE CAPITAL

As of December 31, 2023, and 2022, the Bank's share capital amounted to 80,935 thousand somoni and 70,935 thousand somoni, respectively. The Bank is wholly owned by the Government of the Republic of Tajikistan.

28. CONTINGENT FINANCIAL LIABILITIES

Commitments for capital expenditure

As at December 31, 2023 and 2022 the Bank had no capital expenditure commitments.

Loan related commitments, guarantees and other financial contracts

In the normal course of business, the Bank provides its customers a variety of financial instruments that are accounted on off-balance sheet accounts and have different degrees of risk.

Nominal or contract value of such obligations as at December 31, 2023 and 2022 was as follows:

	December 31, 2023	December 31, 2022
Off balance commitments		
Credit lines	528,068	314,508
Unpaid guarantees	(39,683)	(24,418)
	488,385	**290,090**

Operating lease liabilities

In the course of its current activities, the Bank leases office premises and equipment for its branches. As of December 31, 2023, and 2022, the Bank had no significant obligations under non-cancelable operating lease agreements.

Legal proceedings

From time to time, the clients and congregants of the Bank make claims against it, and the Bank in its turn makes claims against its clients. The Bank has been and continues to be from time to time the object of litigation and court decisions that, individually or in aggregate, did not have a significant negative impact on the Bank. Management believes that the final obligation, if any, in connection with these claims and complaints will not have a material adverse effect on the financial position or the results of the future financial and economic activities of the Bank.

Taxation

The tax legislation of the Republic of Tajikistan allows for various interpretations and is subject to frequent changes. Tax authorities may adopt a stricter stance when interpreting the legislation and auditing tax calculations.

In the opinion of Management, as of the reporting dates, the relevant provisions of the legislation have been interpreted correctly, and the Bank's position, from the perspective of tax legislation, will remain stable.

Economic environment

The Bank's principal business activities are within the Republic of Tajikistan. Laws and regulations affecting the business environment in the Republic of Tajikistan are subject to rapid changes and the Bank's assets and operations could be at risk due to negative changes in the political and business environment.

Recoverability of financial assets

As of December 31, 2023, the Bank's financial assets amounted to 6,160,063 thousand somoni (5,610,982 thousand somoni as of December 31, 2022). The recoverability of these financial assets is highly dependent on the effectiveness of fiscal and other measures taken in various countries to achieve economic stability, i.e., factors beyond the Bank's control. The recoverability of financial assets is determined by the Bank based on the conditions existing as of the reporting date. The Bank's management believes that there is currently no need to create additional provisions for financial assets, based on the existing circumstances and available information.

Operating environment

Emerging market of the Republic of Tajikistan is subject to more risks than developed markets, including economic, political and social, and legal and legislative risks. Past experience shows that actual or potential existing financial problems along with the increase of potential risks associated with investing in emerging economies could adversely affect country's economy in general and its investment climate in particular.

Laws and regulations affecting businesses in the Republic of Tajikistan continue to change rapidly. Tax, currency and customs legislation within the country are subject to varying interpretations, and, also, other legal and fiscal difficulties that the Bank is facing while running its operations in the territory of the Republic of Tajikistan. The future economic direction of the Republic of Tajikistan is largely dependent on economic, fiscal and monetary measures undertaken by the government, together with legal, regulatory developments.

These financial statements do not include any adjustments that would have been a solution for the given uncertainty in the future. Possible adjustments may be made to the statements in that period in which necessity of their reflection will become evident, and it will be possible to estimate their numerical values.

29. TRANSACTIONS WITH RELATED PARTIES

The Bank applies the exemption from the requirements of IFRS (IAS) 24 "Related Party Disclosures" concerning the disclosure of information regarding transactions with related parties and balances from such transactions, including obligations, as it is a state-related entity. Accordingly, the Bank discloses the nature of its relationships with the government, the description, and the amount of each transaction that is significant either individually or in aggregate.

In the statement of financial position as at December 31, 2023 and 2022 the following amounts were represented which arose due to transactions with related parties:

	December 31, 2023			December 31, 2022		
	Weighted average rate	**Related party transactions**	**Total category as per the financial statements caption**	**Weighted average rate**	**Related party transactions**	**Total category as per the financial statements caption**
Customer accounts	6%	2,759,000	5,465,383	6%	1,689,937	4,960,643
Loans to customers	18%	115,241	1,769,346	18%	201,901	1,392,752
Other liabilities		8,665	101,538		12,958	200,299

In the statement of profit or loss and other comprehensive income for the years ended December 31, 2023 and 2022 the following amounts were represented which arose due to transactions with related parties:

	December 31, 2023		December 31, 2022 *(restated)*	
	Related party transactions	**Total category as per the financial statements caption**	**Related party transactions**	**Total category as per the financial statements caption**
Interest income	54,202	455,515	87,035	315,399
Interest expenses	1,209	96,151	139	84,371

30. PRUDENTIAL REQUIREMENTS

In accordance with the statutory quantitative measures, in order to ensure capital adequacy in accordance with established quantitative measures the Bank is required to maintain minimum amounts and norms of ratios of total capital (12%) to total risk weighted assets and ratio of total capital to total assets(10%).

The ratio is calculated in accordance with the rules set by the NBT and may differ slightly from the rules set by the Basel Accord using the following risk assessments for assets and off-balance sheet liabilities less allowance for impairment.

The actual amount and ratios of the Bank's capital are presented below:

	December 31, 2023	**December 31, 2022**
Tier 1 capital flow		
At the beginning of the year	615,367	517,362
Increase in share capital	10,000	10,000
Net profit for the year	134,494	88,005
At the end of the year	759,861	615,367

	December 31, 2023	December 31, 2022
Composition of regulatory capital:		
Tier 1 capital		
The company's equity	759,861	615,367
Excluding the reserve for revaluation of fixed assets	(184,500)	(187,625)
Excluding the net carrying amount of intangible assets	(11,938)	(14,576)
Total Tier 1 capital	**563,423**	**413,166**
Tier 2 capital		
Subordinated loan	(50,000)	(50,000)
Total Tier 2 Capital	**513,423**	**363,166**
Excluding investments in shares for long-term investments	(11,000)	(11,000)
Total regulatory capital	**502,423**	**352,166**
Risk-weighted assets (RWA)	3,526,306	2,027,104
Total assets	**6,893,711**	**6,272,610**

The Bank's capital amount and capital adequacy coefficient are presented below:

Capital amounts and ratios	**Ratio for Capital Adequacy purposes %**	**Minimum Required Ratio %**
As at December 31, 2022		
Capital adequacy ratio K1.1	17.4%	12%
Capital adequacy ratio K1.2	5.6%	10%
As at December 31, 2023		
Capital adequacy ratio K1.1	14.2%	12%
Capital adequacy ratio K1.2	7.3%	10%

As at December 31, 2023 and 2022 total capital of the Bank calculated for capital adequacy purposes consisted of Tier 1 capital and Tier 2 capital.

31. CAPITAL MANAGEMENT

The Bank manages its capital to ensure that the Bank will be able to continue as a going concern while maximizing the return to shareholders through the optimization of the debt and equity balance.

The capital structure of the Bank consists of debt and equity of shareholders, which includes issued capital, reserves and retained earnings as disclosed in statement of changes in equity.

Management reviews the capital structure on regular basis. As a part of this review, management considers the cost of capital and the risks associated with each tier of capital. Based on recommendations of management, the Bank balances its overall capital structure through capitalization of retained earnings, attraction of additional borrowings or the repayment of existing debt.

32. RISK MANAGEMENT POLICIES

Management of risk is fundamental in the Bank's business. The main risks inherent to the Bank's operations include:

- Credit risk;
- Operational risk
- Liquidity risk;
- Market risk.

The Bank recognizes that it is essential to have efficient and effective risk management processes in place. To enable this, the Bank has established a risk management framework, whose main purpose is to protect the Bank from risk and allow it to achieve its planned objectives. These principles are used by the Bank to manage the following risks:

Credit risk

The Bank is exposed to credit risk which is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

Risk management and monitoring is performed by the credit committee of appropriate level and management of the Bank. Before any application is made by the credit committee, all recommendations on credit processes (borrower's limits approved, or amendments made to loan agreements, etc.) are reviewed and approved in prior by the management. Daily risk management is performed by the risk management department.

The Bank has developed policies and procedures to manage credit risk, which includes limiting portfolio concentration and the creation of the credit committee, which monitors the credit risk. The Bank's credit policy is reviewed and approved by the board of directors. The Bank structures the levels of credit risk by setting limits to the size of the risk taken in relation to one borrower or Bank of borrowers, as well as by sector of economy. Monitoring of the actual risks in relation to the established limits is conducted on daily basis.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet obligations related to payment of interest and principal amount, and by changing these lending limits when such necessity is arisen. Exposure to credit risk is also regulated by obtaining collateral and guarantees. Such risks are monitored on a permanent basis and subject to quarterly or more frequent reviews.

Definition of default and recovery

The bank considers a financial instrument as defaulted, and therefore, the third stage (credit-impaired) is applied for impairment calculations in all cases where the borrower has been overdue for 90 days on its contractual payments.

The bank considers interbank balances as defaulted and takes immediate actions when required intraday payments are not settled by the end of the business day, as specified in separate agreements.

As part of the qualitative assessment of whether a client is insolvent, the Bank also considers various events that may indicate a low probability of payment. When such events occur, the Bank carefully considers whether this event should lead to the client being considered in default and, consequently, assessed as Stage 3 for impairment calculations, or whether Stage 2 is appropriate. Such events include:

- legal proceedings, enforcement, or forced execution aimed at recovering debts;
- the borrower's license is revoked;
- the borrower is a co-debtor when the principal debtor is in default;
- multiple restructurings of the same asset;
- there are justified concerns about the borrower's ability to generate stable and sufficient cash flows in the future;
- the debt service coverage ratio indicates that the debt is not sustainable;
- Loss of a key customer or leaser;
- the client has declared bankruptcy;
- restructuring with forgiveness of a portion of the principal (Net Present Value (NPV) loss);

- the credit institution or consortium leader initiates the bankruptcy/insolvency process.

In accordance with the Bank's policy, a financial instrument is considered "rehabilitated" and therefore reclassified from Stage 3 if none of the criteria have been present for at least three consecutive months. The decision on whether to classify the asset as Stage 2 or Stage 1 after rehabilitation depends on the updated creditworthiness assessment during the rehabilitation and whether it indicates a significant increase in credit risk compared to the initial recognition. The Bank's criterion for "rehabilitation" for impairment purposes is less stringent than the 12-month requirement for restructured non-performing assets.

Significant increase in credit risk

On each reporting date, the Bank assesses whether the credit risk of a financial instrument has significantly increased since initial recognition. When conducting this assessment, the Bank uses the change in the probability of default over the expected life of the financial instrument instead of the change in the amount of expected credit losses. In determining whether the risk of default has significantly increased since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Bank's historical experience and expert credit assessment, as well as forecast information.

However, when forecast information is more costly than historical data (either on an individual or collective basis), the Bank uses other criteria to determine a significant increase in credit risk. The Bank establishes criteria for relative quantitative increases in the probability of default (PD) that indicate a significant increase in credit risk. The threshold for an increase in PD to be considered significant varies depending on the PD at initial recognition.

Additionally, in general, qualitative factors indicating an increase in credit risk are reflected in the PD calculation models and, therefore, are included in the quantitative assessment rather than separately in a qualitative assessment. However, if it is not possible to incorporate all current information on qualitative factors into the quantitative assessment, they are separately considered in the qualitative assessment when determining a significant increase in credit risk.

Criteria for loans and advances to customers

Criteria for loans and advances to customers are presented in the following paragraphs. All presented criteria carry equal weight in determining a significant increase in credit risk.

- 30 days past due. More than 30 days past due is an indicator of a significant increase in credit risk.
- Delinquency - up to 30 days. A significant increase in credit risk is considered when, although as of the reporting date the days past due were less than 30, there has been at least one instance of delinquency of more than 60 days within the last 6 months.
- Relative changes in 12-month PD. A significant change in the 12-month PD is considered as a factor in changes in the Probability of Default over the term of the financial instrument. This indicates a significant increase in credit risk. This criterion is used when the Bank operates an internal credit rating system.
- Relative change in Probability of Default over the term of the financial instrument. A significant change in the PD term indicates a significant increase in credit risk. This criterion is used when the Bank operates an internal credit rating system.
- Default (Stage 3) during the last 12 months. A significant increase in credit risk is considered when, although as of the reporting date the outstanding loan amount is not classified as defaulted, it has been classified as Stage 3 at least once during the last 12 months.
- Loans in probationary period. A significant increase in credit risk is considered when an externally borrowed credit or an external inactive credit, which is in the probationary period (period after the curing period), is utilized, provided that the credit does not have any past due days exceeding 30 days or any indications of unlikely repayment.

Criteria for funds in financial institutions

Criteria for funds in financial institutions are presented in the following paragraphs. All presented criteria carry equal weight in determining a significant increase in credit risk.

- 30 days past due. More than 30 days past due is an indicator of a significant increase in credit risk.
- For correspondent and current accounts - 7 days. More than 7 days past due is an indicator of a significant increase in credit risk.
- Delinquency - up to 30 days. A significant increase in credit risk is considered when, although as of the reporting date the days past due were less than 30, there has been at least one instance of delinquency of more than 60 days within the last 6 months.
- Changes in external credit rating / interest rate. Corporate rating will be considered under this criterion. A significant change in the rating assigned by the Big Three rating agencies (Standard & Poor's, Moody's, and Fitch) indicates a significant increase in credit risk. A significant increase in credit risk is considered when the S&P rating is downgraded by one level each time, starting from B2 (S&P) (or equivalent Moody's and Fitch). In cases where financial institutions do not have a corporate rating from a rating agency and the Bank does not have an equivalent internal rating system, the corporate default ratio corresponding to the sovereign rating of the country is considered.
- Relative changes in 12-month PD. A significant change in the 12-month PD is considered as a factor in changes over the entire PD term. This indicates a significant increase in credit risk. This criterion is used when the Bank operates an internal credit rating system.
- Relative change in PD over the entire term. A significant change over the entire term indicates a significant increase in credit risk. This criterion is used when the Bank operates an internal credit rating system.
- Default (Stage 3) during the last 12 months. A significant increase in credit risk is considered when, although as of the reporting date the outstanding loan amount is not classified as defaulted, it has been classified as Stage 3 at least once during the last 12 months.

Criteria for investment financial assets

The criteria for securities are presented in the following points. All presented criteria carry equal weight in determining a significant increase in credit risk.

- Relative changes in 12-month PD. A significant change in the 12-month PD is considered as a factor in changes over the entire PD term. This indicates a significant increase in credit risk. This criterion is used when the Bank has an internal credit rating system.
- Relative change in PD over the entire term. A significant PD over the entire term indicates a significant increase in credit risk. This criterion is used when the Bank has an internal credit rating system.
- Changes in external credit rating / rate. For this criterion, the country rating will be considered for government securities, or the corporate rating will be considered for corporate securities. A significant change in the rating assigned by the Big Three rating agencies (Standard & Poor's, Moody's, and Fitch) indicates a significant increase in credit risk. Significant increase in credit risk is taken into account when the S&P rating drops by one level each time, starting from B2 (S&P) (or equivalent Moody's and Fitch). In cases where security issuers do not have a corporate rating in a rating agency, and the Bank does not have an equivalent internal rating system, the corporate default rate corresponding to the sovereign rating of the country is considered.

Criteria for exiting the stage of significant deterioration

If none of the indicators used by the Bank to assess whether there has been a significant increase in credit risk are present, transition occurs from stage 2 to stage 1, except for loans that are in the recovery phase.

Credit risk assessment

The bank assigns each level of credit risk susceptibility based on various data defined as forecasted default risks and applies credit judgments based on past experience. Credit risk assessments are determined using qualitative (mostly delinquency-driven) and quantitative factors indicating default risk. These factors vary depending on the nature of the risk and the type of borrower.

Grouping of financial assets measured on a collective basis

Classes of assets for which the Bank calculates Expected Credit Losses (ECL) on an individual basis include:

- Individually significant Stage 3 loans regardless of the type of financial assets;
- Significant and unique assets subject to high risk;
- Treasury, trading, and interbank relationships, such as funds in banks, securities held under repurchase agreements (REPO), and debt instruments at amortized cost / fair value through profit or loss (FVTPL);
- Assets subject to high risk that were classified as credit-impaired when the original loan was terminated and a new loan was recognized as a result of debt restructuring.

The Bank groups assets for which the ECL is not calculated on an individual basis for smaller homogeneous portfolios based on a combination of loan characteristics, as described below.

- Loan type (e.g., corporate, mortgage, credit card, consumer loan, etc.);
- Customer type (e.g., individual or legal entity, or industry type);
- Collateral type (e.g., property, accounts receivable, etc.);
- Currency
- Other relevant characteristics.

Restructured and modified loans

The bank sometimes makes concessions or changes to the original terms of loans in response to the borrower's financial difficulties, without taking possession or otherwise securing the collateral. The bank considers loan restructuring or modification in cases of existing or anticipated financial difficulties of the borrower. The bank wouldn't take these actions if the borrower were financially sound. Indicators of financial difficulties include failure to meet obligations or significant issues voiced by the credit risk department. Review may involve extending payment agreements and agreeing to new loan terms. After the review of terms, any impairment is assessed using the initial Expected Credit Loss (ECL) calculated before the terms changed. The bank's policy involves monitoring restructured loans to ensure the likelihood of future payments continuing.

Decisions on derecognition and classification between Stage 2 and Stage 3 are determined on a case-by-case basis.

The bank defines a "recovery period" as a 12-month period following restructuring, which is applied to restructured non-performing cases. Considering that it's not possible to determine financial difficulties immediately after restructuring, the recovery period is necessary to assess whether the loan has been effectively cured. All non-performing loans should remain in Stage 3 after the restructuring date, regardless of loan repayments (without any overdue days, etc.).

The bank defines a probationary period as a 24-month period following the recovery period, which is applied to restructured loans at risk (excluding any grace period). Once an asset has been classified as at risk, it will remain so for at least the 24-month probationary period.

For a loan to be reclassified and cured, the client must meet all of the following criteria:

- all of their assets must be considered operational;
- the two-year probation period has passed since the date of restructuring to become operational;
- regular payments exceeding an insignificant amount of principal or interest have been made for at least half of the probationary period;
- the client does not have a contract that is overdue by more than 30 days.

Probability of Default (PD)

PD represents the probability that a borrower will not fulfill its financial obligations over the next 12 months (12M PD) or for the remaining term.

The Lifetime PD is developed by applying the term of repayment to the current 12-month PD. The repayment profile illustrates how defaults develop across portfolios from initial recognition throughout the loan's term. It's based on observations from past periods and assumed to be consistent for all assets within the portfolio and credit rating range. This is supported by historical analysis.

Expected loss rate in case of default (LGD)

LGD is determined based on the factors that affect recovery after default. They depend on the type of product.

- For secured products, this is primarily based on the type of collateral and the projected value of collateral, historical discounts to market/book value due to forced sales, time to withdrawal, and observed recovery costs.
- For unsecured products, LGDs are usually set at the product level due to limited differentiation in income earned by different borrowers. These LGDs are influenced by collection strategies, including the sale of contractual debts and the price.

The amount of debt at the reporting date exposed to the risk of an impairment event (EAD)

12-month and full-term EADS are determined based on expected payments, which depend on the type of product.

- For amortised products and loans repaid in one amount, it is based on contractual payments due to the borrower within 12 months or for the entire term. It is also adjusted for any overpayments made by the borrower. Assumptions about early repayment/refinancing are also included in the calculation;
- For renewable products, the default risk is predicted by taking the current balance and adding a "credit conversion rate" that takes into account the expected loss of the remaining limit by the time of default. These assumptions vary depending on the type of product and the range of use of the current limit based on an analysis of the latest Bank data.

Forecasted information

To ensure completeness and accuracy, the Bank obtains data from third-party sources (World Bank, National Bank of Tajikistan, Government of Tajikistan, etc.). To assess the impact of macroeconomic factors, the Bank determines weight coefficients for selected macroeconomic indicators and for several scenarios (base, upside, and downside) that are forecasted.

Operational risk

The Bank is exposed to operational risk, which is a risk of loss arising from any system failures or interruptions of internal processes, systems, mechanical error of personnel or the influence of external negative factors.

The Bank's risk management policy is designed to identify and analyze risks and set appropriate risk limits and controls.

Maximum exposure

The Bank's maximum exposure to credit risk varies significantly and is dependent on both individual risks and general market economy risks.

The following table presents the maximum exposure to credit risk on financial assets and contingent liabilities. For financial assets in the statement of financial statements, the maximum exposure is equal to the carrying amount of those assets prior to any offset or collateral. For financial guarantees and other off-balance sheet assets, the maximum exposure to credit risk is the maximum amount the Bank would have to pay if the guarantee was called on or in the case of commitments, if the loan amount was called on.

Collateral pledged is determined based on its estimated fair value on the reporting date and limited to the outstanding balance of each loan as at reporting date.

	Maximum exposure	Offset	Net exposure after offset	Collateral pledged	2023 Net exposure after offset and collateral
Cash and cash equivalents	2,509,485	-	2,509,485	-	2,509,485
Due from banks	1,259,372	-	1,259,372	-	1,259,372
Obligatory reserve in the National bank of Tajikistan	227,743	-	227,743	-	227,743
Loans to customers	1,769,346	-	1,769,346	(912,212)	857,134
Investments held to maturity	264,212	-	264,212	-	264,212
Investment securities	11,000	-	11,000		11,000
Other assets	118,905	-	118,905	-	118,905
	6,160,063	**-**	**6,160,063**	**(912,212)**	**5,247,851**

	Maximum exposure	Offset	Net exposure after offset	Collateral pledged	2022 Net exposure after offset and collateral
Cash and cash equivalents	2,419,120	-	2,419,120	-	2,419,120
Due from banks	1,105,151	-	1,105,151	-	1,105,151
Obligatory reserve in the National bank of Tajikistan	154,579	-	154,579	-	154,579
Loans to customers	1,258,735	-	1,258,735	(557,224)	701,511
Investments held to maturity	617,062	-	617,062	-	617,062
Investment securities	11,000	-	11,000		11,000
Other assets	45,335	-	45,335	-	45,335

In instances where one party to a financial instrument fails to fully or partially discharge a credit obligation, the Bank has the right to ensure fulfillment of these obligations through the:

1 joint sale of the pledged assets;
2 transfer of ownership rights on pledged assets in accordance with the established law; and
3 exercising of the charge on pledged assets through judicial procedures.

Where there is a joint sale of the pledged assets, the Bank normally uses a tripartite sales agreement with the borrower and acquirer of the pledged assets. Under this agreement the acquirer of the pledged assets has an obligation to repay the full amount of the outstanding debt; the borrower has an obligation to transfer the right of ownership of the assets to the acquirer, and the Bank releases the obligation from the borrower and removes the pledge over the assets.
The Bank exercises the charge on pledged assets through judicial procedures if it is impossible or inefficient to use alternative methods or where the seizure of assets pledged is required in order to protect the rights on the Bank.

Financial assets are graded according to the current credit rating they have been issued by internationally regarded agencies. The highest possible rating is AAA. Investment grade of financial assets have ratings from AAA to BBB. Financial assets which have ratings lower than BBB are classed as speculative grade.

The following tables provide classification of financial assets of the Bank by credit ratings:

	Aaa - A3	Baa1-Ba3	B1-B3	Caa1-C	Not Rated	2023 Total

Since not all counterparties of the Bank are rated by international rating agencies, the Bank uses an internal rating and scoring models to determine the rating of the counterparty, comparable to ratings of international rating agencies. Such tools include a rating model for corporate clients, and scoring models for retail and small business customers.

The corporate crediting sector is generally exposed to credit risk that originate in relation to financial assets and contingent liabilities. Main credit risk exposure of the Bank is concentrated within the Republic of Tajikistan. The exposure is monitored on a regular basis to ensure that the credit limits and solvency are followed in accordance with the approved policy on risk management by the Bank.

The following table presents the carrying value of assets that are overdue but not impaired, which are also classified by origination of outstanding debt.

Liquidity risk

Liquidity risk is the risk of difficulties in obtaining funds for the payment of obligations upon the occurrence of the actual date of payment and to meet cash requirements in the process of lending to clients.

Management controls this risk by maturity analysis, determining the Bank's strategy for the next fiscal period. Current liquidity is managed by assets and liabilities committee, which supports the current level of liquidity sufficient to minimize liquidity risk.

The following table presents an analysis of balance sheet interest rate risk and liquidity risk:

	Less than 1 month	1 - 3 months	3 months - 1 year	1 - 5 years	More than 5 years	Undefined	Total 2023

Periods of maturity of assets and liabilities and the ability to replace interest liabilities in acceptable costs (at the time of redemption) are the most important conditions in determining the liquidity of the Bank and its sensitivity to fluctuations in interest rates and exchange rates.

A further analysis of the liquidity and interest rate risks is presented in the following tables in accordance with IFRS 7. The amounts disclosed in these tables do not correspond to the amounts recorded on the statement of financial position as the presentation below includes a maturity analysis for financial liabilities that indicates the total remaining contractual payments (including interest payments), which are not recognized in the statement of financial position under the effective interest rate method.

Undiscounted liabilities analysis

The table below shows the distribution of the Bank's liabilities as of December 31, 2023, and 2022, based on contractual undiscounted cash flows.

	Less than 1 month	1 - 3 months	3 months - 1 year	1-5 years	More than 5 years	Total 2023

Market risk

Market risk includes risk of changes in interest rates, currency risk and other price risks faced by the Bank. In 2023 there was no change in the composition of these risks and methods for assessing and managing risks in the Bank.

The Bank is not susceptible to the change of interest rate risk, since the Bank does not attract money with floating rate. In case of attracting funds with a floating interest rate, the risks will be managed by the Bank by maintaining the necessary ratio between loans at a fixed and floating rate.

Sensitivity analysis to changes in the interest rate.

The bank manages interest rate risks by conducting periodic assessments of potential losses that may arise from adverse changes in market conditions. The controlling department monitors the bank's current financial condition, assesses its sensitivity to interest rate changes, and evaluates their impact on the bank's profitability.

Currency risk

Currency risk is the risk that the value of a financial instrument due to changes in exchange rates. Financial position and cash flows of the Bank are exposed to impact of fluctuations in foreign currency exchange rates. Management exercises currency risk management by determining open currency position on the basis of the alleged impairment of Tajik somoni, and other macroeconomic indicators, which enables the Bank to minimize losses from significant fluctuations in national and foreign currency.

The Bank signs agreements on various derivative financial instruments including foreign exchange swaps and mortgage loans to commercial banks to secure itself against currency risk.

Information about the level of foreign currency exchange rate risk of the Bank is set out below:

Fair value of financial instruments

Fair value is defined as the amount at which a financial instrument could be acquired in an arm's length transaction between knowledgeable, willing, and unrelated parties, other than in a forced or liquidation sale. The estimates presented may not reflect the amounts that the Group would be able to obtain from the actual sale of its holdings of certain financial instruments.

The carrying amount of cash approximates fair value due to the short life of such financial instruments.

IFRS 13 defines fair value as the amount that would be received after selling an asset or paid after transferring a liability in an orderly transaction on the main (or most advantageous) market at the measurement date under current market conditions. Since there are no markets for most of the Bank 's financial instruments, under the current economic conditions and specific risks that characterize the tool, judgment should be applied to determine the fair value.

As at December 31, 2023 and 2022, the following methods and assumptions were used by the Bank to assess the fair value of financial instruments for which it was practical to determine the value:

Cash and cash equivalents - current value of cash and cash equivalents corresponds to fair value.

Accounts receivable and other accounts receivable - current value approximates the fair value of these financial instruments, as the allowance for doubtful debts is valid estimation of the required discount to reflect the credit risk.

Accounts payable and other payables- current value approximates the fair value of given financial instruments due to short-term nature of the loan.

Long-term liabilities - current value approximates fair value as the interest rate of long-term debt approximates market rate, with reference to loans with similar credit risk and maturity at the reporting date.

Fair values are primarily determined using quoted market prices or standard pricing models using observable market inputs where available and are presented to reflect the expected gross future cash in/outflows. The Bank classifies the fair values of its financial instruments into a three level hierarchy based on the degree of the source and observability of the inputs that are used to derive the fair value of the financial asset or liability as follows:

Level 1	Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
Level 2	Level 2 inputs are inputs that are not quoted prices included in Level 1 and that are directly or indirectly observable for the asset or liability.
Level 3	Level 3 similar data is an unobservable input to an asset or liability.

Level 1 classifications primarily include financial assets and financial liabilities that are traded in stock markets, whereas Level 2 classifications primarily include financial assets and financial liabilities which derive their fair value primarily from market quotes and readily observable quotes. Level 3 classifications primarily include financial assets and financial liabilities which derive their fair value predominately from models that use applicable market based estimates surrounding location, quality and credit differentials. In circumstances where the Bank cannot verify fair value with observable market inputs (Level 3 fair values), it is possible that a different valuation model could produce a materially different estimate of fair value.

It is the Bank's policy that transactions and activities in trade related financial instruments be concluded under master netting agreements or long form confirmations to enable balances due to/from a common counterparty to be offset in the event of default, insolvency or bankruptcy by the counterparty.

The following tables show the fair value of financial assets and financial liabilities as of December 31, 2023, and 2022.

	Level 1	Level 2	Level 3	December 31, 2023 Total
FINANCIAL ASSETS				
Cash and cash equivalents	2,509,485	-	-	2,509,485
Due from banks	1,259,372	-	-	1,259,372
Obligatory reserve in the National bank of Tajikistan	-	-	227,743	227,743
Loans to customers	-	1,769,346	-	1,769,346
Investments held to maturity	-	-	264,212	264,212
Investment securities	-	-	11,000	11,000
Other assets	-	-	118,905	118,905

Currency risk sensitivity analysis

The table below presents the sensitivity analysis of the Group to a 10% increase and decrease in the exchange rate of the US dollar against the somoni in 2023 and 2022. The Group's management believes that in the current economic environment in Tajikistan, a 10% increase or decrease represents a realistic change in the exchange rate of the Tajik Somoni against the US dollar. 10% is the level of sensitivity used internally by the Group when reporting foreign exchange risk to the Group's key management personnel and represents the Group's management's assessment of possible changes in foreign exchange rates. The sensitivity analysis includes only foreign currency amounts held at the end of the period, which are converted using rates changed by 10% compared to the current rates.

Below is the impact on net income based on the nominal value of the asset as at December,31 2023 and 2022:

	December 31, 2023		December 31, 2022	
	Official exchange rate, +10%	Official exchange rate, -10%	Official exchange rate, +10%	Official exchange rate, -10%
Effect on profit or loss	42,908	(42,908)	(4,516)	4,516

Limitations of sensitivity analysis

The above tables demonstrate the effect of changes based on the main clause while other assumptions remain unchanged. In fact, there is a connection between the assumptions and other factors. It should also be noted that the sensitivity has nonlinear character so should not be interpolated or extrapolated from these results.

Sensitivity analysis does not take into account that the Bank actively manages the assets and liabilities. In addition, the Bank's financial position may be subject to change depending on changes in the market. For example, the strategy of the Bank's financial risk management aims to manage exposure to market fluctuations. In the case of sudden adverse price fluctuations in the securities market leadership can refer to such methods as selling investments, changing investment portfolio, as well as other methods of protection. Consequently, changes in assumptions may not have influence on the commitment and significant impact on the assets recorded on the balance sheet at market price. In this situation, different methods of valuation of assets and liabilities may lead to volatility in equity.

Other limitations in the above sensitivity analysis include the use of hypothetical market movements with a view to the disclosure of potential risks, which represent only the Bank's forecast of the upcoming changes in the market that cannot be predicted with any certainty.

33. SEGMENT REPORTING

The Bank's activities are exclusively related to commercial lending and other banking operations, and are concentrated in the Republic of Tajikistan.

34. EVENTS AFTER THE REPORTING DATE

As at the date of issue of these financial statements no other significant events or transactions happened, except described above which should be disclosed in accordance with IAS 10 "Events after the reporting period".
